As a Research Associate at Imperial College London, with diverse experience in large commercial companies, startups, and consulting, I aspire to forge a career within the transformative energy industry. Fluent in English and German.

EDUCATION

2023 – 2024	MSc Sustainable Energy Futures	Imperial College London
	- Student representative and co-organiser of a student hackathon with 50 attendees. - Selected from 130 applicants for the semi-finals of the “Climate Investment Challenge”, with a chance to win £10,000. The proposal was a microfinance solution backed by blended capital for solar water pumps in Africa.	
July 2024	Global Summer School of Emerging Engineering	SCUT, China
	Part of the track “Electricity market and advanced power transmission technology for modern power systems”	
2018 – 2022	BSc Industrial Engineering and Management	TU Berlin
	German Grade: 1.6, Top 8% in cohort (First class honours equivalent)	
	Specialisation in information and communication technologies, and the modelling of energy data with Python (Congestion Management in Europe, Demand Response). Learned Python, SQL, and assembly.	
2021 – 2022	ERASMUS Exchange Semester	INSA Lyon
	French Grade: 16/20 (First class honours equivalent)	
	Studied at the Department of Telecommunication and took the following modules: Computer Networks, Data bases and Data Mining, Signal and Image Processing, Software Engineering Techniques	

EXPERIENCE

Oct 2024 – Present	Research Associate	Imperial College London
	- Whole Energy Systems Modeller under Prof. Hawkes, collaborating on a project with University of Oxford and UCL on rebuilding critical infrastructure in Ukraine and exploring green hydrogen production. - Preparing to publish my master's thesis in <i>Nature Communications</i>; results to be presented via a dashboard at a workshop in Laos later this year.	
Apr – Jul 2023	Project Engineer Intern	Tesla
	Part of the Cross Shop Projects Team, responsible for mission-critical projects, and interdisciplinary processes.	
	- Developed a business case for the recycling of batteries in Excel worth over 1 Mio. € - Operationalisation of permit compliance into an IT system with a BPMN flow chart - Coordinated and led a small group of factory workers to create a tool area for manufacturing.	
Sep 2022 – Feb 2023	Data Scientist Intern	Deutsche Telekom
	- Developed an algorithm to streamline the production of weekly sales metrics within a strategic business unit, resulting in time savings of over 10 hours per week. CFO presented this effort at the company's finance conference. - Computed a multivariate time series model with the internal machine-learning package in Python and increased the accuracy of forecasting of roaming costs.	
Jan 2022 – Apr 2022	Management Assistant Intern	Ecopals
	Start-Up for more sustainable road construction by using specific recycled plastics.	
	Led financial analysis for seed round fundraising, working closely with founders, and participated in discussions with investors. The company successfully closed seed round raising 1.5 Mio. €.	
Mar 2020 – Mar 2021	Student Intern	BCG
	- Further development of corona assessment tool on an internal project - Creation of weekly PowerPoint presentation materials for the leadership team	

COMMUNITY

Jan 2020 – Jan 2023	Chair of the board	Boy Scouts Marienhoehe
	- Managed the legal and financial matters for the Central Berlin association with 150 members. - Leading a group and negotiated with state representatives to successfully secure 1 Mio. € of state subsidy for a new building. Created an annual newspaper and instructed youth groups about their articles.	

PERSONAL

Road cyclist with competitive experience, ranked 31st of over 10,000 at VeloCity 2023 in Berlin. Enthusiastic piano player.
